

Ferti-Organic

Super K Fulvate is our traditional fulvic acid plus K₂O and micro elements. It is a 100% soluble powder that provides plants all the essential elements needed while also providing the plant all the advantages of fulvic acid.

It is compatible with pesticides, fertilizers and with most liquid fertilizers, pesticides, herbicides and defoliant. However if the combination has not been previously used a compatibility test is highly recommended.

Store in original container at a temperature above 65 °F. Disposal can be on-site or at an approved waste disposal facility.

Super K Fulvate

Guaranteed Analysis

Total Nitrogen (N) 3%
Soluble Potash (K₂O) 5%

Rate of Application

Add 1 lb. of Super K Fulvate into 120 gallons of water.

For detailed application rates please see the Technical Sheet

Net content 50 lbs.
