Soluble Seaweed Extract is derived from fresh sea kelp called alga (ascophyllum nodosum). The specialized extraction process makes this seaweed non-toxic and nonpolluting seaweed. It is widely used as an "organic fertilizer" in the agriculture industry because of its chemical free composition.

It is harmless with no addition of synthetic hormones making it suitable for all crops and applications including field crops, potting soil, vegetable and flower gardens, orchards and turf grass. Additionally it promotes balanced growth in crops, improves crop quality and increases yield.

GENERAL APPLICATION RATE

Foliar:	400 grams/ acre
Root/drip irrigation:	900 grams/ acre

Disposal may be on-site or at an approved waste disposal facility (please see SDS sheet).

Store in a cool, dry dark place

Net content 50 lbs /22.68 kg
