

# Ferti-Organic

**Ferti-Corn Steep** is a water-soluble fertilizer, derived from corn steep liquor powder, that can be applied directly, or it can be mixed with other liquid fertilizers, or dry fertilizer, whether it is sprayed, irrigated, foliar or applied through soil.

Ferti-Corn Steep powder helps promote the natural growth of plants with nitrogen, phosphorous and potassium. Ferti-Corn Steep is non-toxic, harmless as pollution free. It can also improve the structure and fertility of the soil, promote the activities of microorganisms and soil organisms, and the decomposition of nutrients in the soil in an effective and economic way.

## Ferti-Corn Steep

6.76-7.14-7.25

### Guaranteed Analysis

**Total Nitrogen (N) 6.76%**

6.33% Water Soluble Nitrogen

0.43% Water Insoluble Nitrogen

**Available Phosphate (P2O5) 7.14%**

**Soluble Potash (K2O) 7.25%**

Derived from corn  
steep liquor powder
