

Ferti-Organic

Ferti-Humic is a water soluble powder derived from leonardite with 60% humic acid content.

It has all the characteristics of humic acid without the disadvantages of traditional humic acid like insolubility, precipitation and/or solid separation after dilution is made.

Ferti-Humic

Guaranteed Analysis

Soluble Potash (K₂O) 10%
Derived from: Potassium Hydroxide (Extractant)

ALSO CONTAINS NONPLANT FOOD INGREDIENT
60% Humic Acid (derived from leonardite)
