

Soluble Fulvic Acid is a concentrate from high grade fulvic acid. This high efficiency multi-functional organic fertilizer is ideal in the aid of plant uptake of micro nutrients.

Additionally, it is compatible with most liquid fertilizers, pesticides, herbicides and defoliants. However if the desired combination has not been previously used, a compatibility test is highly recommended.

Soluble Fulvic Acid

Guaranteed Analysis

Fulvic Acid 69%
Nitrogen 0.40%

Vegetable Origin

Guaranteed through International Method
in USA authorized laboratories.

GENERAL APPLICATION RATE

Foliar:	14 oz/ acre 400 grams/ acre
