

Ferti-Organic

Soluble Seaweed Extract is derived from fresh sea kelp called alga (ascophyllum nodosum). The specialized extraction process makes this seaweed a perfect fertilizer allowed in organic production. It is widely used as a "fertilizer for organic production" in the agriculture industry.

It is harmless making it suitable for all crops and applications including field crops, potting soil, vegetable and flower gardens, orchards and turf grass. Additionally it promotes balanced growth in crops, improves crop quality and increases yield.

KEEP OUT OF REACH OF CHILDREN

Soluble Seaweed Extract 0-0-14

Guaranteed Analysis

Soluble Potash (K2O) 14%

Derived from Ascophyllum Nodosum,
Potassium Sulfate, Potassium Hydroxide.

Information regarding the contents
and levels of metals in this product
is available on the internet
